AUTHENTIC

LOW RISK

94.2 % Authenticity

High probability of organic biometric consistency & natural capture.

Authentic: 94.2%

Manipulated: 5.8%

Model Confidence: 96.0%

DETECTED EVIDENCE & ARTIFACTS

GENUINE CAMERA SIGNATURE

- Natural optical sensor noise and consistent photon transfer curve verified.
- Facial landmarks and eye-mouth contours remain anatomically and temporally stable.

OBSERVATIONS & DIAGNOSTICS
